

NAZEER JOSEPH

Senior Power BI Developer | Business Intelligence & Data Engineering

Cape Town, South Africa | 061 404 2923 | nazeer.joseph@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL PROFILE

Senior Power BI Developer with 6+ years of experience across business intelligence, data integration and data engineering. Builds enterprise Power BI solutions, semantic models and SQL/Python pipelines that turn complex operational data into reliable reporting. Experienced with NetSuite, Salesforce, Microsoft Fabric, Azure and REST APIs, with a strong focus on automation, data quality and scalable delivery.

TECHNICAL SKILLS

BI & ANALYTICS Power BI, DAX, Power Query, semantic modelling, star schemas, RLS, Tableau, Pyramid, Advanced Excel

DATA ENGINEERING SQL Server, T-SQL, ETL/ELT, data warehousing, SCD Type 2, incremental loading, watermarks, data quality, reconciliation, SSIS, REST APIs

PROGRAMMING & CLOUD Python, PySpark, Polars, SQLAlchemy, Microsoft Fabric, Azure, Git, GitHub Actions, Power Apps, Azure OpenAI, Microsoft Copilot

PROFESSIONAL EXPERIENCE

Senior Power BI Developer / Data Engineer | [Morae · Hybrid](#)

JUL 2025 – PRESENT

- Develop and maintain Power BI dashboards, reports and semantic models that support business decision-making.
- Build and manage scalable ETL/ELT pipelines in Microsoft Fabric and Azure, using PySpark, Python and SQL for ingestion, transformation, automation and data-quality workflows.
- Develop and optimise SQL queries, stored procedures, DAX calculations and Power Query transformations for performance and reliability.
- Integrate NetSuite, Salesforce and other business systems into centralised analytics and reporting solutions.
- Translate stakeholder requirements into end-to-end data and analytics solutions while establishing BI and data-engineering standards, governance, documentation and best practices; support team members and end users.

Power BI Developer | [CDW](#)

SEP 2024 – JUN 2025

- Developed and maintained Power BI reports, semantic models and DAX measures for enterprise reporting requirements.
- Used SQL and Power Query to prepare, validate and integrate data while supporting performance, quality and stakeholder delivery.

Data Integration Team Lead | [DataOrbis](#)

JAN 2023 – AUG 2024

- Led regional data-integration operations, overseeing the team, automated data feeds and SQL databases to maintain reliable delivery.
- Directed new-source onboarding across APIs, web scrapers and RDBMS platforms; coordinated suppliers, troubleshooting and business planning.
- Planned workloads and budgets, mentored team members and strengthened documentation, handover and process controls.

PROFESSIONAL EXPERIENCE

Data Integration Analyst | [DataOrbis](#)

FEB 2022 – DEC 2022

- Maintained and optimised automated data feeds and SQL databases, resolving failures and improving data integrity and delivery reliability.
- Worked with stakeholders to design data flows, databases and workflows, supplying fit-for-purpose data to Power BI, Pyramid and Tableau.

Project Analyst | [DataOrbis](#)

JUN 2021 – JAN 2022

- Scoped and documented requirements, designed data models and coordinated delivery across Business Intelligence, Insights and Operations.

Junior Project Analyst | [DataOrbis](#)

FEB 2020 – MAY 2021

- Supported project planning, foundational data flows, reporting workflows, documentation and client handovers.

Leading SharePoint Developer in Training | [Knights Innovation Support Centre](#)

AUG 2019 – JAN 2020

- Managed and trained a team of five SharePoint developers while supporting client engagement, delivery and project reporting.
- Developed SharePoint and front-end solutions using HTML, CSS and JavaScript, with SQL and Excel supporting data analysis and reporting.

DEDAT ICT CAPACITI Learnership | [EOH](#)

FEB 2019 – JUL 2019

- Completed workplace-readiness training and hands-on learning in IT, networking, business concepts, Java and Python development.

FEATURED PROJECTS

NetSuite ETL & Sales Pipeline Analytics | *Python · SQL Server · Power BI* | [GitHub repository](#)

- Built an end-to-end NetSuite data platform that ingests source files, transforms customer, item, transaction, budget and FX data, and loads a reporting-ready warehouse for Power BI.
- Implemented incremental watermarks, hard-delete handling, SCD Type 2 history, data-quality gates, audit logging and source-to-target reconciliation.

Microsoft Fabric View Auditor | *Microsoft Fabric · Python · SQL · AI automation* | [GitHub repository](#)

- Developed an automated utility to capture Fabric SQL view definitions, identify object-level changes and produce structured, review-ready audit outputs.
- Combined metadata checks, evidence capture and AI-assisted difference summaries to reduce manual review effort and improve traceability.

EDUCATION

BCom Honours in Information Systems | 2022

[University of the Western Cape](#)

Research project: Applied machine-learning and data-analysis methods to South African Twitter data to investigate indicators of depression.

BCom in Information Systems, IT & Management | 2018

[University of the Western Cape](#)

Graduated cum laude; Dean's Honours Award; first place in Digital Business Innovation (IFS353); invited to the Golden Key Honour Society.

National Certificate: Information Technology (Systems Development) | 2020
